PROFESSIONAL SUMMARY

QA Automation Engineer with hands-on experience in manual and automation testing using **Playwright, JavaScript, Postman, Swagger, and SQL**. Skilled in functional, regression, smoke, API, and end-to-end testing across multiple web applications. Experienced in Agile/Scrum workflows, defect lifecycle management, and full-stack application support using **Next.js, Streamlit, and PostgreSQL**.

EXPERIENCE

Unique School App India LLPJune 2025 – Present
Software EngineerPune, India

- Executed manual and automation testing across **10+ web applications**, ensuring software quality, functionality, and stable production releases
- Developed and maintained **Playwright automation scripts using JavaScript/TypeScript**, reducing repetitive regression testing effort
- Performed **functional, regression, smoke, cross-browser, and end-to-end testing** across multiple projects
- Conducted API validation and backend testing using **Postman** and **Swagger**
- Worked closely with developers and product teams to identify, debug, track, and resolve defects throughout the **STLC and SDLC**
- Built and supported internal full-stack applications using **Next.js, Streamlit, PostgreSQL, and SQL**
- Improved application maintainability by refactoring reusable UI components and optimizing backend workflows
- Validated database operations and performed data verification using SQL queries
- Participated in Agile/Scrum ceremonies including sprint planning, defect triaging, testing cycles, and deployment validation
- Maintained detailed test cases, bug reports, QA documentation, and release verification reports

Unique School App India LLPJune 2024 – June 2025
QA Intern / Software Testing InternPune, India

- Performed manual testing across **10+ applications** to validate functionality, UI responsiveness, and business requirements
- Executed functional, regression, smoke, and usability testing to improve software reliability and user experience
- Identified, documented, and tracked defects using Agile defect lifecycle processes while coordinating with development teams
- Assisted in creating automation test scripts using **Playwright with JavaScript**
- Prepared and maintained test cases, defect reports, and QA documentation for multiple releases
- Participated in requirement analysis, release validation, retesting, and quality assurance activities
- Gained practical experience in **STLC, SDLC, Agile methodologies, API testing, and automation testing workflows**

PROJECTS

CMS Project

- Performed end-to-end manual testing for CMS modules to ensure application quality and workflow stability
- Automated regression and critical user flows using **Playwright with TypeScript**
- Collaborated with developers and business teams to validate requirements and resolve reported defects

YHD Project

- Executed functional and regression testing for complete application workflows
- Performed API testing using **Postman** and **Swagger** for request and response validation
- Developed reusable Playwright automation scripts for scalable test execution

Appendix Project

- Conducted end-to-end manual testing to validate usability, business requirements, and application behavior
- Designed and executed UI, functional, and regression test cases
- Tracked defects and coordinated with developers for issue resolution and retesting

School Apps Project

- Tested school management modules including attendance, student management, and administration systems
- Executed smoke, regression, functional, and cross-browser testing across multiple devices
- Prepared QA documentation, reported defects, and validated fixes before production releases

Timesheet Web Application

- Developed a timesheet management web application using **Streamlit** and **PostgreSQL**
- Implemented features for employee timesheet tracking, validation, and report generation
- Performed debugging, testing, and performance optimization to ensure smooth functionality

EDUCATION

Industrial Institute of Computer Research and Management (IICMR) <i>Master of Computer Applications (MCA) CGPA: 7.71</i>	2022 – 2024 Nigdi, Pune
Shri Shivaji Science College <i>Bachelor of Computer Applications (BCA) Percentage: 75%</i>	2019 – 2022 Amravati, Maharashtra

TECHNICAL SKILLS

Automation Testing: Playwright, Selenium
Manual Testing: Functional Testing, Regression Testing, Smoke Testing, End-to-End Testing, Cross-Browser Testing, STLC
API Testing: Postman, Swagger, API Validation
Languages: JavaScript, TypeScript, Python, SQL
Frontend: React.js, Next.js, HTML, CSS
Database: PostgreSQL, MySQL
Tools & Platforms: Jira, GitHub, Bitbucket, Trello, Git
Development Methodologies: Agile, Scrum, SDLC, Defect Lifecycle
AI-Assisted Development Tools: ChatGPT, Claude, Gemini, DeepSeek
